

A mineral supplement containing a blend of spices and vitamin C to keep poultry healthy

What is it?

Poultry Pep is a tasty aromatic blend of spices and vitamin C that has a whole host of benefits to help support all round condition and encourage birds to eat their ration.

Key Benefits

- Contains vitamin C to support all round condition and performance
- Especially beneficial at times of extreme hot or cold weather
- Helps birds get over the moult
- Encourages consumption
- Helps maintain immunity
- Promotes good egg shell quality
- Supports egg laying performance
- Encourages growth

Benefits Of Vitamin C

Vitamin C (Ascorbic acid) is a white compound that is synthesized by poultry in the kidneys. During stress however, this ascorbic acid becomes insufficient to meet the bird's requirements. Vitamin C helps reduce stress related problems such as poor immunity, feed intake, oxidative stress, poor growth, egg shell quality and egg laying performance.

The addition of vitamin C in AgriVite Poultry Pep gives the product the perfect formulation for an effective all round supplement and moult treatment.

When Should I Use It?

Poultry Pep is particularly effective for use in extreme hot or cold weather conditions and during the moult

Which Poultry Can I Use It On?

Poultry Pep™ is suitable for chickens, turkeys, geese, ducks, pigeons and game birds

Dosage

1 heaped scoop with the daily feed ration for every 10 birds
